Dear Prime Minister's Office,

Please provide a full, accurate and complete list of records held within your office, and or under your authority, describing the isolation of a SARS-COV-2 virus, directly taken from a symptomatic patient of COVID-19 where the sample was not first combined with any other source of genetic material (not limited but by way of example monkey kidney cells, aka vero cells, liver cancer cells) thereby eliminating contamination as a possible alternative source of sampling.

Please note isolation is used in the normally understood meaning of the word – the act of separating a thing from another. I am not referring, and hence not requesting, to isolation meaning the culture of something else, the performance of an amplification test (eg PCR test which only detect mRNA or DNA) or the sequencing of "something".

If any records match the above description and are available to the public elsewhere, please provide enough information so that I may identify and access each record with certainty (i.e. title, author(s), date, journal, and weblink or location where the public may access it).

I remind you full, accurate and complete disclosure is required.

Yours faithfully,

Marc Horn

Dear Mr Horn

You request - FOI2020/10121 - was replied to on the 18/8/2020 - on behalf of the Cabinet Office as a whole.

Regards

FOI Team

Dear Prime Minister's Office,

You are in breach of your legal duties and obligations of providing the required information by the 21 August 2020 to allow full accountability of your actions to the public.

Please immediately correct your breach within the next 3 working days.

Yours faithfully,

Marc Horn
